

DR. SCHNEIDER R&D CENTER, KRONACH

- 1 Sound-dampening partitions and height-adjustable desks allow for concentrated work in each sector of the large open office complex. The ergonomically formed furniture is white-gray with Sonoma oak and accents in the corporate color, blue.
- 2 The assistance area is creatively and spatially integrated into the office environment, which allows for the optimal communication flow.
- 3 The conference rooms offer flexibility and all technological possibilities, within a confined space.
- 4/5 The separate kitchen, with coffee shop styling, serves as a mid-day meeting point or break time hangout while bar tables provide a place for spontaneous meetings.
- 6/7 The creative areas are comfortably arranged with large-format designed partitions that shield this area from the office area, to offer a relaxed setting for inspiring exchange and creating fresh ideas.

BUILDING

Dr. Schneider Kunststoffwerke Neuses,
Research and Development Centre, 2016

Project

Construction of an office building for the Dr. Schneider
Kunststoffwerke Research and Development department.

Concept

The three-storied building is functionally and clearly structured
both inside and out. From modern large open office complexes and
conference rooms, creative areas and kitchens, to presentation-
and show-room, each work procedure has its suitable zone.

The sustainable building concept meets the energy and heating
technologies' highest requirements.

Architects

Ingenieurbüro Kropf GmbH, Kronach

Planning Interior: A2S-Einrichtungssysteme GmbH

FEATURES

Interior Design

Concept

Here approximately 220 engineers, developers and innovation
managers find the fitting surroundings for their various work areas
and work phases - whether secluded or in groups. The facility was
individually designed following the customer's wishes.

Options

Light, functional offices with the newest technological equipment,
make relaxed and concentrated work possible, whether in the
seated or the standing positions at the height-adjustable desks.
In contrast, the vibrantly designed kitchens and creative areas
create an inspiring homey atmosphere. This encourages creativity
and inspires exchange, throughout the day.

Sustainability

Quality made in Germany. Responsible management of resources
is essential for products that will shape generations to come. A2S
have already netted a host of awards and certificates for their short
manufacturing chains, refusal to use solvents and tropical woods,
and standards that are well within legal maximums.
