

FIRSTWALD PROTESTANT HIGH SCHOOL, KUSTERDINGEN

1

- 1/3 The multifunctional atrium forms the heart of the building. Its everyday use is as a canteen, but for special events it can also serve as a function hall.
- 2 Folding tables allow for quick and easy room transitions, while the four-legged, stacking chairs, with their triple-tinted white multiplex seats, can be linked to form neat rows.
- 4/5 The combination of double and individual tables, with stacking C-shaped cantilever chairs, allows for flexible room arrangements that suit different teaching methods. The individual tables are also height-adjustable.
- 6 Comfortable beanbag chairs break up the straight lines.
- 7/8 Incorporating the corridors makes flexible study possible throughout the building - either in groups at a round table, or in complete peace in one of the screened study carrels.

BUILDING

Firstwald Protestant High School, Kusterdingen, 2015

Project

A school building with a ground floor that will be a 'roofed plaza within the building' for multi-functional occupation and use is being added to the Kusterdingen campus.

Concept

Masonry has been used for the solid parts of the building fabric, using sustainable construction techniques. The atrium, which is open to all the floors above, forms a center point around which the other rooms are arranged. Public facilities such as the canteen, library, and music room, are located on the ground floor, while all the general classrooms and group rooms are located on the first floor. The second floor houses the specialist subject rooms, the teacher's area, and the school's administrative offices.

Architects

KLUMPP + KLUMPP Architekten BDA, Stuttgart

FEATURES

Interior Design

Concept

Harmoniously blending the materials and color scheme of the building's design concept, the unforced straight lines in white and light gray have been incorporated into the fixtures and fittings. They are understated, with a flexibility that ensures a flowing transition between learning methods.

Options

Whether in a traditional classroom, open study areas set up with round group seating, in the canteen, or at one of the screened side hall work spaces, everyone - from groups to individual students - will find a study space that is right for them. Flexible furniture means that the canteen can quickly and easily be transformed into a theater auditorium or function hall.

Sustainability

Quality made in Germany. Responsible management of resources is essential for products that will shape generations to come. A2S have already netted a host of awards and certificates for their short manufacturing chains, refusal to use solvents and tropical woods, and standards that are well within legal maximums.
